## Born in July: Famous Inventor Nikola Tesla

Nikola Tesla (July 10, 1856–January 7, 1943) was a Serbian-American inventor, electrical engineer, and futurist. As the holder of nearly 300 patents, Tesla is best known for his role in developing the modern three-phase alternating current (AC) electric power supply system and for his invention of the Tesla coil, an early advancement in the field of radio transmission.

During the 1880s, Tesla and Thomas Edison, inventor and champion of direct electrical current (DC), would become embattled in the “War of the Currents” over whether Tesla’s AC or Edison’s DC would become the standard current used in long-distance transmission of electrical power.

### Nikola Tesla Fast Facts:

- **Known For:** Development of alternating current (AC) electrical power
- **Born:** July 10, 1856 in Smiljan, Austrian Empire (modern-day Croatia)
- **Parents:** Milutin Tesla and Duka Tesla
- **Died:** January 7, 1943 in New York City, New York
- **Education:** Austrian Polytechnic Institute in Graz, Austria (1875)
- **Patents:** US381968A—Electro-magnetic motor, US512,340A—coil for electro-magnets
- **Awards and Honors:** Edison Medal (1917), Inventor’s Hall of Fame (1975)
- **Notable Quote:** “If you want to find the secrets of the universe, think in terms of energy, frequency and vibration.”
