### Health Tip

The fatty layer below our skin gets thinner with age, making seniors more sensitive to the dehydrating effects of sun exposure. To help stay safe from sun damage, follow these tips:

- Use sunscreen with at least 30 SPF, and UVA and UVB ray protection
- Reminder to cover commonly missed areas, such as the ears, upper lip, hands, and feet
- Wear loose, light-colored clothing to help feel cooler
- Wear sunglasses or a brimmed hat to protect the skin around your eyes
